FIRELINE FD30s | FIRE DOOR

FIRELINE FD30s Fire Doors are manufactured using a specially developed GRP (glass-reinforced polymer) door slab and frame system incorporating advanced fire-resistant additives. The low-maintenance door with the Winkhaus FireFrame frame system have been independently tested by Warringtonfire for fire, smoke and security performance.

Fully compliant with current Building Regulations and third-party certification requirements, FIRELINE FD30s provides a robust, reliable and secure fire door solution. Engineered to withstand temperatures of up to 900°C, delivering up to 30 minutes of fire and smoke resistance, helping to protect occupants and properties when it matters most.
