Apartment Entrance Door Collection

Stylish Security for Modern Living

Introducing Our Selective Range of Entrance Doors with Electronic Latch Striker Technology
Designed specifically for apartment entrances, our doors combine **elegant aesthetics** with **cutting-edge convenience**. Each door is equipped with an **electronic latch striker**, allowing for connection to a **remote release**—perfect for granting access to foyers or shared areas without compromising security.

For residents and key holders, entry and exit are effortless thanks to a **simple internal lever handle**, ensuring ease of use without sacrificing safety.

Timeless Designs, Built to Last

Choose from **6 traditional door styles**, each crafted to enhance the character of your building. With a palette of **17 durable foiled colours**, our doors offer a **fade-resistant, hardwearing finish** that stands the test of time—both in style and performance.

Secure. Stylish. Smart.

Upgrade your apartment entrance with doors that deliver on all fronts.

Customisable Frames for a Perfect Match

All doors come **standard with a white door frame**, but for those seeking a more personalised look, we offer a choice of **16 foiled frame finishes** to complement your building's aesthetic.

Secure. Reliable. Effortless.

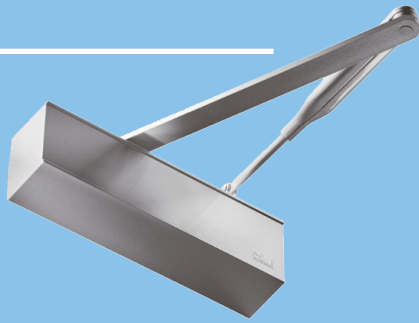

All our doors are engineered with precision and built for performance. Each unit features a traditional mortice latch mechanism paired with a durable internal stainless-steel lever handle, allowing for smooth and swift exit with a simple retraction of the latch.

Internal Lever Handle

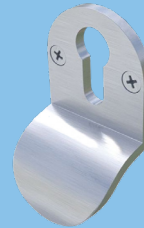

Mortice Lock

Overhead Door Closer

To ensure consistent security and convenience, an overhead door closer automatically returns the door to its closed position after use—maintaining safety and energy efficiency.

From the exterior, our doors are equipped with a stainless-steel pull escutcheon surrounding a Sold Secure 3-star rated half euro-cylinder. Entry is granted only by retracting the latch via a key-operated euro-cylinder or through the release of the electronic latch striker.

External Pull Escutcheon

3* Half Euro-Cylinder

Advanced Electronic Latch Striker

Our **electronic latch striker** is designed for both security and flexibility. It features a **short stainless-steel** faceplate and is **fail secure as standard**, meaning the door remains locked in the event of a power failure—providing peace of mind when it matters most.

The striker allows for **3mm of adjustment** for precise alignment and includes a **mechanical unlocking lever** for permanent opening when required. It supports a **12V AC connection** and is **site settable**, allowing for tailored configuration to suit your specific installation needs.

The electronic latch striker offers **flexible access control** and can be integrated with a variety of release mechanisms, tailored to meet your specific installation requirements.

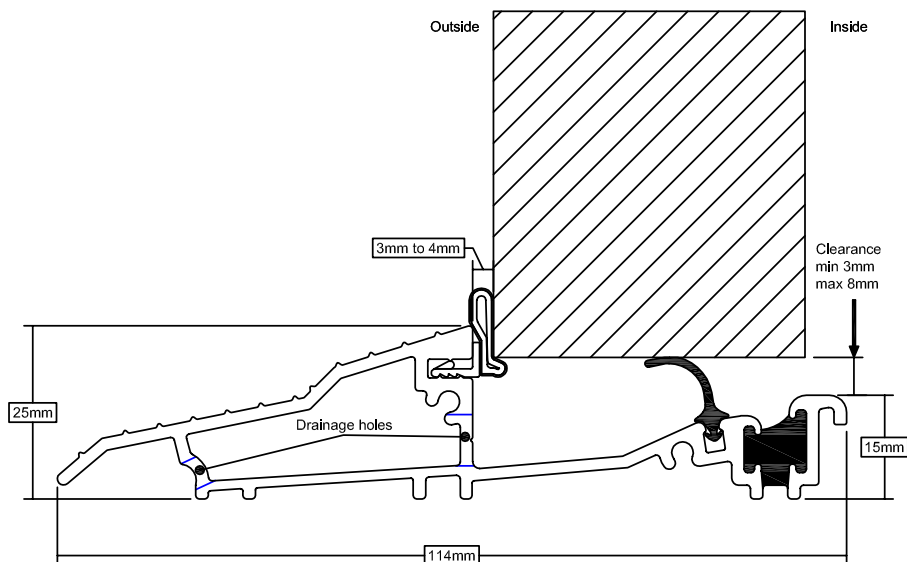

A release mechanism is not included.

Versatile Door Solutions for Every Space

Our range of doors is designed with flexibility in mind. Whether you need a single door or a configuration that includes side panels and fanlights, we can tailor the solution to suit your space and style.

For enhanced accessibility, we recommend our doors come supplied with the Stormguard AM3EX low aluminium threshold, which is Part M compliant—ensuring smooth and easy access for all users.

Clarity or Privacy—You Choose

Our doors come glazed as standard with clear glass, offering a sleek and modern look. However, we also offer a wide selection of patterned and decorative glass options, each providing varying levels of obscurity. Whether you're looking for maximum light or enhanced privacy, we have the perfect glazing solution to meet your needs.

Disclaimer on Apartment Entrance Doors

Due to the communal nature of apartment entrance doors—which are frequently accessed by multiple occupants—and their reliance on a central mortice latch for security, no guarantee can be provided against thermal movement of the door. Additionally, no warranty or implication is made regarding the effectiveness of weather sealing. These doors are designed primarily to restrict unauthorised access, not to provide thermal or environmental isolation.
